

Adopted
Amendment to Cost Allocation Rule
Section 9-2
August 2, 2024

9-2. CALCULATION OF NET ASSET VALUE

FPIF shall determine a Net Asset Value for each Participating Pension Fund as follows:

- (a) The initial Net Asset Value and for each Participating Pension Fund will be determined based on the assets transferred from the Participating Pension Fund to FPIF on its Transfer Date.
- (b) Each month following the initial determination of Net Asset Value for each Participating Pension Fund, the Net Asset Value of each Participating Pension Fund will be determined based on the Participating Pension Fund's percentage ownership of the total FPIF Investment portfolio. Each Participating Pension Fund's percentage of the total FPIF Investment Portfolio will be calculated each month based on the ending Net Asset Value from the prior month adjusted for additional cash contributions, asset transfers and withdrawals by the Participating Pension Fund to the total FPIF portfolio on a time weighted basis. The Income and Expense activity for the month will then be allocated to each Participating Pension Fund based on their time weighted ownership percentage for the month, except as otherwise provided in these Rules.
- (c) Specific costs that are incurred by FPIF to address or accommodate the needs or challenges of, or circumstances caused by, a particular Participating Pension Fund or group of particular Participating Pension Funds, which are not, in the determination of the Executive Director, customary for the typical needs, challenges, or circumstances of a Participating Pension Fund, and which the Executive Director determines should not or cannot in fairness be allocated proportionately among all Participating Pension Funds as described in Section 9-2(b), will be allocated to that particular Participating Pension Fund or group of particular Participating Pension Fund.
